

SHEET LINES

“COMPAC”

During the course of more than 30 years in the manufacture of machinery, our premise has always been the quality of our products. We know that perfection does not exist, but we are sure that we strive for it with perseverance and determination.

In the last decade, our evolution has taken us to the technological top at international level, being to date, the first company to manufacture production lines in all the sectors in which we are represented.

Thank you for trusting in our perseverance

CEO - José Ferrando García

DESCRIPCIÓN

Machine that allows the insertion of rubber bands and other elastics in different types of textiles.

TECHNICAL CHARACTERISTICS

- ESTRUTURE

Formed steel structure. Currently all Jofesa machines are manufactured with structure finished in electrogalvanised and fire-lacquered paint.

- TECHNICAL CHARATERISTICS

Possibility of programming the distances between injection and sheet cutting.

Program the cuts in centimetres, not by stitches (more accuracy and simplicity of use).

In its handling.

99 different programmes that can be carried out automatically or manually.

It includes an Egasus Ex3216 machine, polisher, bed and automation.

- CONTROL

Machine control by PLC-Omron.

- INTERFEACE USUARIO/MÁQUINA

Omron touch screen user/machine interface.

- PRODUCTION

Production: 100 pieces/hour.
